

MASTER OF INTERNATIONAL AFFAIRS
MASTER OF PUBLIC ADMINISTRATION

INTRODUCTION TO SIPA

Since 1946, Columbia University's School of International and Public Affairs has been offering graduate and professional education to students interested in policymaking. The research and educational programs of the School in the twenty-first century reflect the evolving history of policy debates around the globe in the decades since the School was established. In the aftermath of the Second World War, U.S. policy leaders focused on the nation's need to develop deep regional expertise after a long period of isolationism. SIPA's Master of International Affairs program and the University's regional institutes were born in this policy environment. In 1977, as the world's large welfare states began to debate the proper balance between government and markets in the management of social imperatives, SIPA created the Master of Public Administration degree.

In the intervening years, the programs of the School have continued to mirror and engage with the world around it. As policy issues including environment, health, and education began to cross borders and as international issues such as trade and migration became subjects of intense national and local debate, the traditional boundaries between "international" and "domestic" policy have blurred. At the same time, employers began to demand both the reliable skill set of a common core curriculum and an area of substantive policy expertise. As a result, the curricula of SIPA's MIA and MPA programs have gradually moved closer together. Prospective students will still notice differences in the programs that reflect their histories and student bodies: There is more international content in the MIA core; the MPA core has more national and local policy content (although often in a global comparative context). Students in both programs choose SIPA for its balance of theory and practice, and find, as you will too, that their classmates' perspectives are as varied as their diverse backgrounds. Nonetheless, most students would say that an MIA student tends toward a more global and theoretical approach to policy questions, while an MPA student is more likely to focus on questions of policy processes and implementation at a national or local level.

This publication focuses on the School's two-year, full-time degree programs. Prospective students should also be aware that SIPA offers its model of education, a rigorous common core matched with focus on a policy area, in a variety of other formats, including the Executive MPA, the Program in Economic Policy Management MPA, the Environmental Science and Policy MPA, the MPA in Development Practice, and the PhD in Sustainable Development. Further details on all of SIPA's programs are available on our Web site: sipa.columbia.edu/academics/index

COMPARISON: MIA AND MPA DEGREE REQUIREMENTS AND OPTIONS

	MIA	MPA
Core Requirements		
Politics	<i>Conceptual Foundations of International Affairs</i> and one course from a menu of courses on interstate relations	<i>Politics of Policymaking I and Politics of Policymaking II</i>
Economics (select one sequence, corresponding to your concentration below)	<i>Economic Analysis I and II</i> or <i>Economics I and II</i>	
Statistics	<i>Quantitative Analysis</i>	
Management (choose one)	<i>Public Management or Nonprofit Management</i>	
Financial Management (choose one)	<i>Budgeting, Accounting or Economics of Finance</i>	
Internship	Required	
Professional Development	Required	
Workshop	Not required for the MIA degree, but recommended in most concentrations	Required
Foreign Language Proficiency	Required	Not required (except for students concentrating in Economic and Political Development)
Policy Concentration Options: All students choose one concentration: a policy field in which they wish to focus their studies at SIPA		
	Economic and Political Development Energy and Environment Human Rights International Finance and Economic Policy International Security Policy Urban and Social Policy	
Specialization Options: All students also choose one specialization: a skill or area of specialized knowledge to pair with their concentration		
	Advanced Policy and Economic Analysis Applied Science International Media, Advocacy and Communications International Organization Management Regional Specialization: Africa; East Asia; Europe; Latin America; Middle East; Russia, Eurasia, and Eastern Europe; South Asia; United States	
CU Dual Degree Options		
	MIA and JD MIA and Master of Public Health MIA and MS in Social Work MIA and MS in Urban Planning MIA and MBA MIA and MS in Journalism	MPA and JD MPA and Master of Public Health MPA and MS in Social Work MPA and MA, Jewish Theological Seminary MPA and MA in Quantitative Methods and Social Sciences
International Dual Degree Options		
	MIA/Diplôme, Institut d'Études Politiques de Paris MIA/MPP, National University of Singapore MIA/MPP, Hertie School of Governance, Berlin MIA/Professional Master's in International Management or Public Policy, Fundação Getulio Vargas, Escola de Administração de Empresas de São Paulo (FGV-EAESP)**	MPA/MPA, Institut d'Études Politiques de Paris MPA/MPP, National University of Singapore MPA/MPP, Hertie School of Governance, Berlin MPA/MPA, London School of Economics and Political Science MPA/Professional Master's in International Management or Public Policy, Fundação Getulio Vargas, Escola de Administração de Empresas de São Paulo (FGV-EAESP)**
	**For fall 2009, pending approval	**For fall 2009, pending approval

POLICY CONCENTRATIONS AND COCURRICULAR PROGRAMS

In addition to required core courses (compared in the table at left), the MIA and MPA consist of two other major elements: concentrations and specializations. Concentrations provide students with in-depth, substantive knowledge about major global public policy issues, while specializations equip students with high-level skills and specialized knowledge that will enable them to apply their policy knowledge effectively in a wide range of professional settings. Each MIA and MPA student is required to fulfill the requirements of one concentration and one specialization. Concentrations are similar to a “major,” and specializations are similar to a “minor.”

Students can choose from among the following six concentrations: Economic and Political Development; Energy and Environment; Human Rights; International Finance and Economic Policy; International Security Policy; Urban and Social Policy. And students can choose from among the following six specializations: Advanced Policy and Economic Analysis; Applied Science; International Media, Advocacy and Communications; International Organization; Management; Regional. Within the Regional specialization, there are the following eight options: Africa; East Asia; Europe; Latin America; Middle East; Russia, Eurasia, and Eastern Europe; South Asia; United States. For more information on the specializations, please see sipa.columbia.edu/academics/index

Concentrations bring together active communities of faculty, practitioners, students, and alumni to pursue not only the highest quality classroom education, but also research, extracurricular programming, career networking, and alumni outreach. Although concentrations constitute important centers of intellectual and programmatic activity, SIPA also retains a distinctive interdisciplinary and multidisciplinary culture, and students are encouraged to participate in the programs of other concentrations, centers, and institutes.

Policy Concentrations

Economic and Political Development (EPD):

The Economic and Political Development concentration attracts diverse students from around the world who are dedicated to the eradication of poverty and its causes and the expansion of human development in the form of expanded capabilities and freedoms. The EPD approach is to provide students with a strong, historically grounded awareness of the shifting trends and ideas in development and of track records of projects and policies. This equips EPD students with a critical analytical orientation to the practice of development and strong insights into successes that can be built upon through advocacy and key skills such as policy analysis or monitoring and evaluation. EPD graduates go on to become administrators, managers, advisors, and analysts with non-governmental organizations, multilateral institutions, consulting firms, development banks, and governments.

Energy and Environment (EE): The Energy and Environment concentration provides students with the analytical tools and substantive knowledge to address key economic and environmental challenges

of the twenty-first century. Prior to fall 2009, SIPA offered two separate concentrations: International Energy Management and Policy and Environmental Policy Studies. Beginning in fall 2009, these concentrations were combined into one concentration with two separate tracks in order to build upon and deepen shared resources, courses, and faculty expertise.

Because energy and the environment are intimately connected to society's productivity and sustainability, our ability to properly protect, develop, and manage our natural assets requires well-trained leaders with both strong technical skills and a grounding in earth sciences, politics, management, economics, quantitative techniques, business, market and regulatory structures, and policy analysis. The energy track focuses on energy business development and energy policy. The environmental track focuses on the policy and management knowledge required to address the most pressing environmental sustainability issues. Graduates of both tracks have gone on to successful careers in public, private, and nonprofit organizations, working in carbon-trading enterprises, energy corporations, government ministries and regulatory agencies, research institutions, and nonprofit advocacy organizations.

Human Rights (HR): This concentration offers a range of interdisciplinary approaches to human rights, building on the core curriculum. The teaching and study of human rights at SIPA and Columbia transcend traditional academic boundaries, departments, and disciplines to address the ever-increasing complexities of human rights in a globalized world. The Law School offers particularly rich course work to complement opportunities at SIPA. And Columbia University's Center for the Study of Human Rights (CSHR) collaborates closely with SIPA and the Law School, actively engaging human rights practitioners to inform the academic work of Columbia's faculty and students. The Human Rights concentration trains students for different professions, notably international human rights advocacy, monitoring and reporting, policy and empirical analysis, NGO development, and the protection of refugees and displaced persons.

International Finance and Economic Policy (IFEP):

The International Finance and Economic Policy concentration provides students with the analytical skills and theoretical understanding to pursue leadership careers in the international economy in the public or private sectors. Prior to fall 2009, International Finance and Policy and International Economic Policy existed as distinct concentrations. They have been combined into one concentration with two separate tracks in order to build upon and deepen shared resources, courses, and faculty expertise. The international finance track prepares students for careers that require knowledge of international finance, capital markets, banking, and public policy in the financial sector. The international economic policy track studies the theory, formulation, institutional history, track records, and economics of international trade policies and international monetary relations. Graduates of these concentrations have pursued a wide variety of careers. In the public sector, these include central banks, ministries of finance or treasuries, government agencies responsible for domestic and international

economic matters, and international organizations such as the World Bank, the IMF, and the World Trade Organization. In the private sector, students routinely join investment banks, commercial banks, hedge funds, private equity funds, economic and corporate consulting firms, and research institutions. The recent credit crisis, however, is profoundly changing the world's financial landscape, and many traditional Wall Street jobs may become less readily available. IFEP students will be well equipped to work in the changing public and private sectors to help build new types of financial institutions and bring fresh thinking to regulatory policy.

International Security Policy (ISP): This concentration focuses on international conflict and conflict management, defense policy, military strategy, arms control, intelligence, peacekeeping, coercion, negotiation, and alternatives to the use of force as an instrument of policy. It provides a conceptual foundation for understanding conflict and the political, economic, and military components of policies and capabilities for coping with the possibility of war, as well as expertise for analyzing specific functional and regional security issues. SIPA's International Conflict Resolution Program and the Saltzman Institute of War and Peace Studies are two research units at the School closely connected to the concentration. The course of study prepares students for employment in a wide range of professional positions: government (for example, the U.S. departments of State and Defense, intelligence agencies, Congressional Research Service, Congressional Budget Office, and legislative staffs, or their foreign counterparts), international organizations such as the United Nations, consulting firms, public interest organizations, nonprofit research institutes, journalism, or other areas. ISP also attracts many students interested in the field of conflict resolution.

Urban and Social Policy (USP): The Urban and Social Policy concentration is designed to provide students with an understanding of the policy challenges and opportunities that are particular to cities in both the developed and developing world. Cities now have responsibilities in virtually every policy arena from developing infrastructure to sustainable economic development to meeting the basic needs of safety, security, and human welfare—including education, health, and housing. Within the concentration, students have the option of focusing on urban policy or social policy. The urban policy track is designed to provide students with an understanding of policy issues that are unique to the urban environment, and to enable them to think critically about the economic, social, political, and technological forces that shape urban areas across the globe. The social policy track is motivated by the challenges of immigration and immigrant incorporation, growing racial and ethnic diversity in societies around the world, and changing gender relations. Students in the social policy track can focus on a specific area of social policy or tailor the concentration to fit their unique interests. Students concentrating in Urban and Social Policy pursue careers in local government, the private sector, not-for-profit organizations, think tanks, advocacy groups, and contract services providers.

Cocurricular Programs

As explained above, students in the MIA and MPA degree program must complete the requirements of a policy concentration AND a specialization. SIPA also sponsors cocurricular programs that feature research and activities in the following four areas: Humanitarian Affairs, UN Studies, International Conflict Resolution, and Gender and Policy. Courses and workshops sponsored by these programs meet the requirements of specific concentrations and specializations, but the programs themselves do not constitute areas of concentration or specialization.

Humanitarian Affairs

The Humanitarian Affairs Program provides a learning environment for both practitioners and academics concerned with humanitarian assistance in the wake of catastrophic natural disasters and complex humanitarian emergencies caused by acts of social violence, such as civil war, genocide, or ethnic strife. It pays considerable attention to the links among prevention, relief, and postconflict recovery, as well as to issues of effectiveness and efficiency in the management of international humanitarian organizations.

UN Studies

The UN Studies Program promotes teaching, training, and career development for SIPA students interested in global governance. Through a variety of courses and panel discussions with prominent practitioners, it strives to increase students' understanding of the history, inner workings, and challenges associated with the UN's role in the world today. In addition, UN Studies strengthens links and creates networks with alumni and UN-related organizations in New York and around the world.

International Conflict Resolution

The Center for International Conflict Resolution (CICR) contributes to the resolution of international deadly conflict through research, teaching, and fieldwork. It strives to increase understanding of international conflicts through innovative, collaborative research and is committed to offering courses that disseminate knowledge about conflicts and their causes. Scholars in the field link their work to the study of development, human rights and humanitarian affairs, security policy, and social psychology. The CICR also has coordinated efforts of academics and practitioners from governmental, nongovernmental, and international organizations in joint research and action.

Gender and Policy

The Gender and Policy Program endeavors to use gender to examine both domestic and international policy challenges. In dealing with issues as diverse as talent pipelines, dependency ratios, outsourcing, or human rights, it is increasingly critical to understand the cultural and structural constraints of gender, as well as the barriers that linger in the professional workplace.

Public Sector

Multilateral Organizations

European Union; Inter-American Development Bank; International Finance Corporation; International Monetary Fund; Organisation for Economic Co-operation and Development; United Nations Children's Fund; United Nations Development Program; United Nations Environment Program; World Bank

U.S. Government

Central Intelligence Agency; Defense Intelligence Agency; Federal Reserve Bank of New York; Millennium Challenge Corporation; U.S. Agency for International Development; U.S. Department of Defense; U.S. Department of Energy; U.S. Department of Homeland Security; U.S. Department of Housing and Urban Development; U.S. Department of State; U.S. Environmental Protection Agency; U.S. International Trade Commission; U.S. Government Accountability Office; U.S. Office of Management and Budget

State/Local Governments

California Air Resources Board; Los Angeles Homeless Services Authority; NYC Department of Consumer Affairs; NYC Economic Development Corporation; NYC Office of Management and Budget; NYC Small Business Services; NY State Public Management Institute; Office of Mayor Michael Bloomberg; The Port Authority of NY & NJ

Foreign Government

Central Bank of Iran; Central Bank of Sudan; China Banking Regulatory Commission; Government Housing Bank, Thailand; Japan Bank for International Cooperation; Ministry of Development, Spain; President of Afghanistan

Private Sector

Consulting

Abt Associates Inc.; Accenture; Booz Allen Hamilton; Booz & Company; Boston Consulting Group; Chemonics; Dalberg; Deloitte Consulting; Development Alternatives Inc.; Ernst & Young; Eurasia Group; ICF International; Kinetix; KPMG; London Economics International; Malcolm Pirnie; McKinsey & Company; PricewaterhouseCoopers

Energy

FREQUENTLY ASKED QUESTIONS ABOUT APPLYING

What are the application deadlines?

MIA and MPA Programs

January 5: deadline for fall admission.

All materials, including test scores and letters of reference, must be in the Admissions Office by this date. Applications completed after this date will be reviewed on a space available basis only.

October 1: spring semester (no fellowship consideration)

MPA in Environmental Science and Policy

November 1: early decision

January 15: for fellowship consideration

February 15: final deadline (without fellowship consideration)

Program in Economic Policy Management (PEPM)

January 1: with fellowship consideration

Executive MPA

March 1: early decision

July 1: final deadline

PhD in Sustainable Development

December 15: with fellowship consideration

Can I visit the campus?

There are no official tours of the SIPA building. However, tours of Columbia's main campus are given by the Visitors Center and can be arranged by calling 212-854-4902.

The SIPA Admissions Office offers weekly information sessions for the MIA and MPA programs at most times throughout the year. The schedule for these sessions does change, and space is limited. Please contact us at least two weeks in advance at 212-854-6216 or at sipa_admission@columbia.edu for the current schedule or to reserve a space.

Can I apply online?

We strongly encourage applicants to submit all of the required application documents and application fee via the online application system at www.sipa.columbia.edu/admissions. One hundred percent of the required documents can be submitted via the application Web site. We recommend submitting Section 1, the application and fee, as soon as possible. After completing Section 1, applicants can later proceed to Section 2 to upload the remainder of the required documents. Submitting all of your documents online has many advantages. Applicant data arrives securely, directly, and immediately into the SIPA admissions system, without data entry errors. Detailed instructions are on our Web site.

What do you look for in an applicant?

The Admissions Committee seeks to admit applicants with a combination of the proven academic ability to master SIPA's rigorous curriculum and two to three years of relevant professional-level

work experience. Due to the diversity of our applicant pool, the Admissions Committee does not set cutoffs for GPAs or GRE scores. Each applicant's personal, professional, and academic history is thoroughly reviewed to determine if SIPA is the correct fit for the applicant.

We evaluate all candidates based on the following criteria: the personal statement, résumé/curriculum vitae, transcripts of prior college and/or graduate school work, letters of recommendation, and, lastly, the GRE.

The personal statement is the single most important part of the application. In it you should clearly demonstrate your interest in the program and how it fits into your specific career goals.

Do I need to have a certain major?

You are not required to have a specific undergraduate major. However, students with majors that are far removed from the International Relations or Public Administration fields are advised to address with extra care in their essay why they now wish to "change gears" and study at SIPA.

How important is work experience?

Most successful applicants have had at least three years of work or internship experience relevant to their intended course of study at SIPA. It is impossible to make specific recommendations about what kind of work experience is considered appropriate; our applicants come from every corner of the globe with vastly different backgrounds and professional experiences. Previous experience will certainly make your application more competitive.

Do you accept applicants directly from undergraduate schools?

About 10 percent of the accepted students each year come directly from undergraduate institutions. These are individuals with extraordinary academic records who have also had significant internship and/or study abroad experience. Recent undergraduates with very strong academic credentials might be encouraged to reapply after they have pursued one or more years of relevant work.

What is your GRE policy?

SIPA requires submission of the GRE for all applicants to the two-year, full-time MIA and MPA programs. The Admissions Committee may grant waivers of this requirement in rare cases. Most waivers are approved only if an applicant can prove that taking the GRE would pose a tremendous hardship. SIPA will accept the GMAT in place of the GRE. If you have questions concerning this requirement, please send an e-mail to sipa_admission@columbia.edu.

What is the average/minimum GPA/GRE score for successful applicants?

We do not keep statistics of average GPAs or GRE scores, and there are no minimums for either. The

Admissions Committee carefully reviews every application and considers grades, particularly those in relevant course work, in the context of the applicant's personal statement and intended course of study.

Do I have to take the TOEFL?

An international student whose bachelor's degree was not earned from an institution in which English was the language of instruction must submit proof of competency in English. Applicants currently attending an English-speaking graduate school are not exempt. Competency in English can be demonstrated by the following methods:

- A. Taking the Test of English as a Foreign Language (TOEFL), and receiving a minimum score of 600 on the paper test or 250 on the computer based test or 100 on the iBT. For more information: www.ets.org/
- B. Taking and submitting results from the International English Language Testing System (IELTS) with a score no less than 7. For more information: www.ielts.org
- C. Achieving a grade of ALP 8B on the Columbia American Language Placement Examination offered at Columbia University. For more information: www.ce.columbia.edu/alp/.

The scores listed above are minimum scores. The Admissions Committee reserves the right to require additional English language study at Columbia prior to enrollment, and minimum scores do not automatically exempt an admitted candidate from this requirement or guarantee admission to our programs.

Do I need to have my foreign documents translated?

All foreign documents, such as official transcripts and letters of recommendation, must be translated by an official translator and notarized as authentic translations by a notary public. For translation of foreign credentials, contact:

Globe Language Services
Evaluation Service
319 Broadway
New York, NY 10007
212-227-1994
www.globelanguage.com

Do I have to be fluent in a foreign language?

All Master of International Affairs candidates and MPA candidates studying Economic and Political Development are required to demonstrate proficiency in a foreign language to graduate.

For more information:

To be placed on our mailing list, please visit: www.sipa.columbia.edu/sipa-prospect

For additional questions, see www.sipa.columbia.edu/admissions/faq.html

Other Degree Programs Offered at SIPA

MPA in Development Practice

The MPA in Development Practice incorporates perspectives from agriculture, environmental and climate sciences, economics, engineering, health, nutrition, political science, and technology in the design, implementation, and management of effective sustainable development policies. This globally based program combines rigorous education at SIPA with hands-on learning in leading development organizations around the world. For more information: www.sipa.columbia.edu/mdp

MPA in Environmental Science and Policy

The MPA in Environmental Science and Policy combines Columbia University's hands-on approach to teaching public policy and administration with pioneering thinking about the environment. This twelve-month program is jointly sponsored by SIPA and the Earth Institute at Columbia University. For more information: www.columbia.edu/cu/mpaenvironment

The Executive Master of Public Policy and Administration (EMPA)

The EMPA program is designed for the experienced professional who is looking for a top quality graduate program but is unable to pursue full-time study. The program, which can be completed in either two or three years, incorporates the broad questions of public affairs and the specific analytic and communication skills of management and policy analysis into its curriculum. For more information: www.sipa.columbia.edu/empa

The Program in Economic Policy Management (PEPM)

The Program in Economic Policy Management provides mid-career professionals and policymakers with the skills to effectively design and implement economic policy, emphasizing the problems of developing and transition economies. Students who complete the 14-month program are awarded the Master of Public Administration (MPA). For more information: www.sipa.columbia.edu/pepm

PhD in Sustainable Development

The PhD in Sustainable Development combines elements of a traditional education in social sciences, particularly economics, with significant training in the natural sciences. The program's graduates will be uniquely qualified to undertake serious research and policy assessments to deal with some of the most crucial problems in the developing world. For more information: www.sipa.columbia.edu/phd
